Rigidply produces standard and custom Laminated Wood Beams in many shapes and sizes. Laminated Wood Beams offer many advantages when building Homes, Schools, Religious Facilities, Commercial, Recreational and Agricultural structures.

In addition to traditional Laminated Wood Beams and Columns, an infinite number of curved shapes can be achieved with Rigidply's engineering and manufacturing capabilities.

Offering a rich, warm feeling that enhances any structure, Laminated Wood Beams are superior in strength to solid sawn lumber. They resist checking and twisting, and provide a dimensionally stable, dependable installed product. Rigidply has been manufacturing Laminated Wood Timbers continuously since 1954!

Advances in engineering and manufacturing efficiencies have reduced product lead times and made Laminated Wood Timbers more economical than ever before.
